**PLEASE PRINT LEGIBLY**

Entrant #            **A** Space            Skill Level:  Jr  B  I  X Category 3. Vignette  
(select only one) (select only one from the list)

Entry Title M1 Abrams, CAT '85 Scale 1/72

Kit(s) Used Hasegawa kit #31133

Theme:  (None)  
(check as applies)

Tell us about your model (what you did to make it look like it does):

Replaced the Rear Tail Light Guards & lights with cut brass tubing & 3D printed Taillights from another project. Scratch-built brackets for the Smoke Dischargers. Cut-off the Spare Tracks from the kit Bustle Rack and added details to the links. Used Bustle Racks from an ESCI kit, but used sheet styrene for the top hatches of the Storage Bins. Also used ESCI Drive Sprockets (drilled mud holes & thinned outer plate) and Engine Grate Brackets. Used Tea Bag for Engine Deck Screens. Used round Grant-line Eyebolts around the Commander's Cupola. Drilled holes in the kit Headlights and punched aluminum foil with a drill bit shaft to create headlights, filled in with Jeweler's Crystal Epoxy. Added wire conduit to Smoke Dischargers. Added Wire and PE fret for Fender Springs, Tie Downs and rear Taillight. Painted center rings of gray Rubber on the road wheels to simulate "paired" wheels. Used reflective wrapping film glued to clear styrene sheet cut into rectangles for the periscopes coated with Future. Used stretched sprue antennas with glue "balls" on the ends. Painted using Pactra Field Artillery FS34079 along with Polly Scale Dirt & Dust acrylics, and oil paint washes.

See attached sheets for photos of changes and details added.
